## Of Native Fruits, Trees, Vines and Bushes

ESTABLISHED 1881

F. R. SIMONS, Proprietor

WOGANSPORT, N. D.

NURSERY LOCATED NEAR BISMARCK, ON THE EAST BANK OF THE MISSOURI RIVER

For a period of five years the government of North Dakota gives a bounty of \$2.00 for every 80 rods of rows planted and cultivated along the public highways and boundary lines. Fruit trees and bushes may be planted between the trees.

Price for planting Trees, Bushes, and Shrubs is One Cent for Each Foot in Height Vines Each Five Cents  
Plants and Roots at One Cent Each Discount on Large Orders

## AGREEMENT

For Planting Nursery Stock on the Time Plans where assurance is given that the Stock will be properly cultivated

A \$25.00 order for nursery stock will entitle the purchaser to the two seasons' growth plan.

A \$50.00 order for fruit trees and bushes will entitle the purchaser to the fruit plan at 5 cents per quart.

This AGREEMENT, made this.....day of.....19.....at.....between F. R. Simons, party of the first part, and.....party of the second part,

Witnesseth, that the said F. R. Simons agrees to plant in rows nursery stock to the value of \$....., as described in an order of even date and tenor, on the.....quarter of S.....T.....R.....in the.....of 19....., and replant the following spring any that may fail to grow.

The party of the second part agrees to prepare the ground for planting the season before, as follows: By plowing open a perfectly straight ditch (north and south when practicable) as deep as possible where he wishes the trees and bushes planted, and keep the weeds and other vegetation from growing and absorbing the moisture and plant food for a space of at least twenty feet each side of the ditch by frequent deep plowing, always turning the furrows away from the ditches.

Party of the second part also agrees to keep all weeds and other vegetation from growing and absorbing the moisture and plant food for a space of at least twenty feet each side of the rows each season by frequent deep plowing, cultivating and hoeing. To plow deep at least once as soon as the frost is out of the ground, once each during the months of June and July, and once just before it freezes up in the fall each year.

Party of the second part also agrees to stir the ground near the trees and bushes immediately after each rain during April, May and June the first season after planting.

Owing to our limited moisture, party of the second part also agrees to keep trimmed from time to time, as becomes necessary, all trees and bushes in the single stem pyramid plan, cutting away all other shoots as soon as they appear, and cutting back all side branches to a compact form with a single head.

Under the two seasons' growth plan party of the second part agrees to pay F. R. Simons during the month of October following two seasons' successful growth, the amount of above order without interest.

Under the fruit plan, party of the second part agrees to pay during the month of October of each year five cents per quart for each quart of fruit produced that season, until the amount of above order is paid in full without interest.

Party of the second part agrees to allow F. R. Simons or his duly authorized agent, without process of law, to enter above mentioned grounds and remove above mentioned nursery stock at any time party of the second part fails to perform any part of above agreement.

Above mentioned nursery stock to remain the property of F. R. Simons until paid for, warranted against all claims.
